

FastFuel

Központosított étteremlánc-kezelő rendszer

By:

-Tircsi Kolos

-Császár Zoltán

-Massman Noah James

Bevezetés és Üzleti Logika

Üzleti és felhasználói folyamat

A Probléma

A FastFuel rendszer több problémát is képes megoldani egy kisebb étteremlánc számára

- Kaotikus, papíralapú munkafolyamatokat leegyszerűsíti
- Lassú konyhai kommunikációt felgyorsítja
- Javítja a vendégélményt

Ki a célközönség?

A projekt egy 5-10 étteremből álló
étteremláncnak lett szánva, ami szeretné a
teljes munkafolyamat digitalizálni

Miért a FastFuel?

Az étlap kezelése

A rendelések felvétele

A konyhai feladatok automatikus szétosztása

A dolgozók konyhai állomásokra való betanításának nyilvántartása

A rendelési állapot valós idejű megjelenítése a vendégek számára

A műszakbeosztás kezelése

Az egyes éttermekhez tartozó adatok nyilvántartása

A felhasználók regisztrációja és kezelése típusok szerint,

A tetszőleges számú szerepkör létrehozását és jogosultságok szabályozása

About

About Fast Fuel

Fast Fuel is a restaurant management and ordering service built to keep ordering, kitchen flow, and staff operations neatly grouped.

What we do

The system brings customer ordering and internal restaurant workflows under the same umbrella so teams can move from order intake to preparation and status tracking with smoothness.

Core areas

- ⚡ **Fast ordering:** A straightforward interface for browsing menus, placing orders, and tracking status.
- ⚡ **Restaurant operations:** Tools for menus, stations, machines, and management on one platform.
- ⚡ **Team support:** Dedicated views for staff, admins, and customers based on their roles and permissions.

Who it is for

Fast Fuel is designed for customers placing orders and for restaurant team(s) managing menus, staff, stations, and service operations.

3 Nagy Kihívás

Inkonzisztens kódformázás

```
Checking formatting...
[warn] src/components/StationTasks/StationTasks.tsx
[warn] Code style issues found in the above file. Run Prettier with --write to fix.
✖ Check FAILED in: client/fast-fuel
Fix it by running:
  cd client/fast-fuel
  npm run format

```

```
📁 Checking folder: client/fast-fuel for: Frontend type errors

```

```
> fast-fuel@0.0.0 test:ts
> tsc --noEmit
✔ Check passed: client/fast-fuel

```

```
✖ COMMIT BLOCKED

```

```
One or more checks failed.
Fix the issues using the commands above,
then commit again.
⚠ Bypass (NOT recommended):
  git commit --no-verify

```

Jogosultságkezelés implementációja
